EDUCATION

Chitkara University

Bachelor of Engineering in Computer Science (8.88/10 CGPA)

Patiala, PB

June 2021 – June 2025

D.A.V. Public School

PCM in 12th (89.4%)

Hamirpur, H.P.

March. 2019 – March 2020

COURSEWORK

Data Structures Algorithms Discrete Math Computer Network Computer Architecture

PROJECTS

Personal Website | *Next.js, Tailwind CSS, TypeScript* | [GitHub](#) | [Live](#)

March 2024

- My personal website, crafted with Next.js, Tailwind CSS, and TypeScript, offers a sleek and modern design.
- Features a collection of captivating blog articles, covering a variety of topics, from technology to personal reflections.
- Seamlessly integrates Next.js for dynamic page rendering and Tailwind CSS for a polished and responsive layout.
- Built with TypeScript for enhanced code readability and maintainability, ensuring a smooth and delightful browsing experience.

Anime-API | *Express.js, Cheerio, TypeScript* | [GitHub](#) | [Live](#)

Dec 2023

- Anime-API is an unofficial API developed in TypeScript and Express.js.
- It utilizes the Cheerio web scraping library to gather data on various anime titles.
- Offers developers a streamlined way to access anime information programmatically.
- Empowers users to fetch details like titles, genres, ratings and more for their favorite anime shows.

LiveXpanse | *React.js, Express.js, PostgreSQL, TypeScript, Tailwind CSS* | [GitHub](#)

March 2024

- Cutting-edge digital community platform that integrates collaborative streaming and interactive forums.
- Offers secure user authentication, comprehensive CRUD operations, global chat, and dynamic community forums.
- Aims to redefine the user experience in digital content sharing and discussions.

FXX Forum | *Next.js, Express.js, TypeScript, MongoDB, Tailwind CSS* | [GitHub](#) | [Live](#)

Sept 2023

- Fxx Forum is a community-driven forum platform built with Next.js, Express.js, MongoDB, TypeScript, and Tailwind CSS.
- Users can create threads and engage in discussions on various topics within the forum.
- Employs MongoDB for efficient data storage and retrieval, ensuring scalability and performance.
- Utilizes JSON Web Tokens (JWT) and Bcrypt for enhanced security measures, ensuring only authorized users can manage tasks.

ToDo-rust | *RUST* | [GitHub](#) | [Crate](#)

March 2024

- ToDo-rust, a command-line interface (CLI) application written in Rust for efficient task management and productivity tracking.
- Implemented features for adding, done, undone, deleting, and viewing tasks with intuitive command-line operations.
- Utilized Rust's robust performance and safety features to create a reliable and fast tool for daily to-do list management.

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Java, Python, HTML/CSS, SQL, PostgreSQL

Frameworks: Next.js/React.js, Express.js, TailwindCSS

Developer Tools: Git/GitHub, (Neo)Vim, Tmux, GNU/Linux, Bruno, Docker

INTERESTS

Linux Open Source Cyber Security
